

ZAUGG DEPOSIT SYSTEM

for REFORM Multi

**Fast. Flexible.
Economically.**

REFORM 

TECHNOLOGY AT ITS BEST

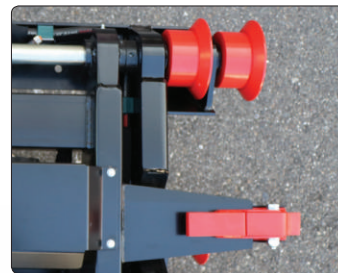

REFORM Muli with Zaugg deposit system

Flexible use with convenient hook device

The combination of REFORM Muli and Zaugg hook device is ideal for all transport tasks in the municipal sector. The combination of Muli T10 X and Zaugg hook device is the perfect combination for practical application, which can be used efficiently 365 days a year.

The device makes it possible to implement different platforms in a very short time. The abundance of different skips is almost limitless and individually customisable. The exchange system ensures a high degree of flexibility. Various loading docks or containers allow autonomous working at any time, for example in waste clearing, paper collections, but also in area and greenery maintenance. Not only skips

or tipper bridges can be handled quickly with a hook device, even a salt spreader can be easily operated with the hook device. So it is easy to spread salt in the morning, to use the skip at noon, and to move out again with the salt spreader in the evening. The new hook devices are now an ideal addition to the range.

The hook device can be operated with the Muli joystick inside the cab or outside with the RECON wireless remote control

Optional with tool box

Double-track system and automatic locking of the skip

Your benefits

- High strength and flexibility through special U-frame profile
- Low setup costs by fitting accuracy on the REFORM chassis
- High corrosion protection by 2-component paint finish
- High flexibility and autonomous work thanks to change system
- 5.0 ton thrust-buckling hook device
- Double-track system: 860 mm and 1,060 mm
- 900 mm hook height
- Automatic locking of the skip
- Low centre of gravity through low design
- Operation via RECON or vehicle joystick in cab
- Additional: Cone system locking for slide with crane attachments, Rugged mudguards made from aluminium checker plate, various versions for wheelbases, PTO, trailer hitches, pole mounts, tool box, etc.

Illustrations may show special equipment. Typographical errors and technological changes excepted.
