

SHOVEL ZR 2000 is intended for loading of bulk cargoes such as snow, sand, rocks, salt, gravel, coal and other materials like those. It is suitable for plowing parking areas, where snow need to be removed. Shovel ZR 2000 has two side hatches, which are controlled hydraulically. The hatch have enabled lateral adjustment of the terrain and are hydraulically protected against overload. Blade on side hatches are adjustable in height. For a better view on a blade it has cut a slot. The volume of the shovel is about 1000l.

Standard equipment:

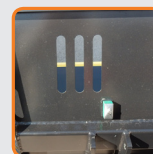

- Hydraulic valve with accumulator
- Hydraulic installation with quick mounts
- Universal mounting
- Hydraulic side hatches
- Blade (Hardox)
- Protecting lateral tilt of the hatches
- Blades on side hatches
